The key for SUMLEV is as follows:

MEDIAN AGE FEM

050 = County and/or Statistical Equivalent

The key for the YEAR variable is as follows:

1 = 4/1/2010 Census population

2 = 4/1/2010 population estimates base

3 = 7/1/2010 population estimate

4 = 7/1/2011 population estimate

5 = 7/1/2012 population estimate

6 = 7/1/2013 population estimate

7 = 7/1/2014 population estimate

8 = 7/1/2015 population estimate

9 = 7/1/2016 population estimate

10 = 7/1/2017 population estimate

11 = 7/1/2018 population estimate

12 = 7/1/2019 population estimate

Note: The estimates are based on the 2010 Census and reflect changes to the April 1, 2010 population due to the Count Question Resolution program and geographic program revisions. For population estimates methodology statements, see http://www.census.gov/programssurveys/popest/technical-documentation/methodology.html.

Median age for female population

The 6,222 people in Bedford city, Virginia, which was an independent city as of the 2010 Census, are not included in the April 1, 2010 Census enumerated population presented in the county estimates. In July 2013, the legal status of Bedford changed from a city to a town and it became dependent within (or part of) Bedford County, Virginia. This population of Bedford town is now included in the April 1, 2010 estimates base and all July 1 estimates for Bedford County. Because it is no longer an independent city, Bedford town is not listed in this dataset.

As a result, the sum of the April 1, 2010 census values for Virginia counties and independent cities does not equal the 2010 Census count for Virginia, and the sum of April 1, 2010 census values for all counties and independent cities in the United States does not equal the 2010 Census count for the United States. Substantial geographic changes to counties can be found on the Census Bureau website at https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html.
